

A large grid of graph paper with a 1cm square pattern, occupying the right half of the page. The grid is composed of 20 columns and 30 rows of small squares. The lines are thin and black, creating a uniform grid structure.

-----

---

-----

---

The image shows a vertical sheet of graph paper. It features a primary grid of 10 columns and 10 rows, defined by thicker, darker lines. Within each of these 10x10 cells, there is a secondary, finer grid of 10 columns and 10 rows, defined by much thinner, lighter lines. This creates a total of 100 small squares per large grid cell. The grid is centered on the right side of the page.

-----

---

The image shows a vertical sheet of graph paper. It features a primary grid of 10 columns and 10 rows of large squares. Within each of these large squares, there is a secondary grid of 10 columns and 10 rows of smaller squares, creating a total of 100 columns and 100 rows of the smallest grid units. The grid is composed of thin black lines on a white background.

---

-----

---

A large grid of graph paper with a 1cm square pattern, occupying the right half of the page. The grid is composed of 20 columns and 30 rows of small squares. The lines are thin and black, creating a standard graph paper layout.

-----

---

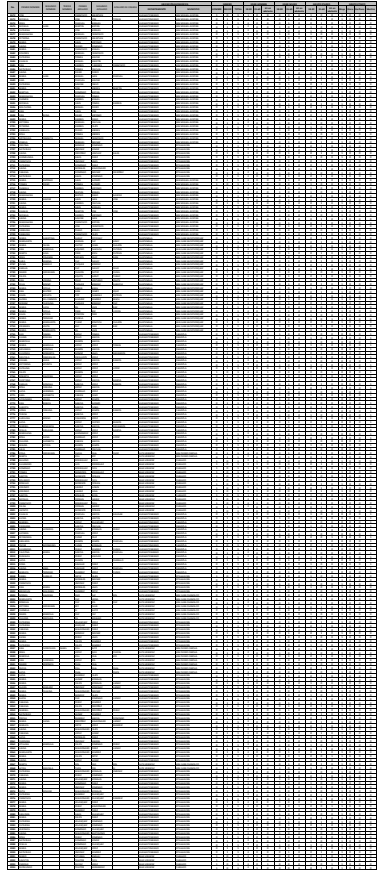

-----

---

This image shows a large, empty grid of graph paper. The grid is composed of 20 columns and 30 rows of small squares. The lines are thin and black, creating a uniform pattern across the entire area. There is no text or data within the grid.

---

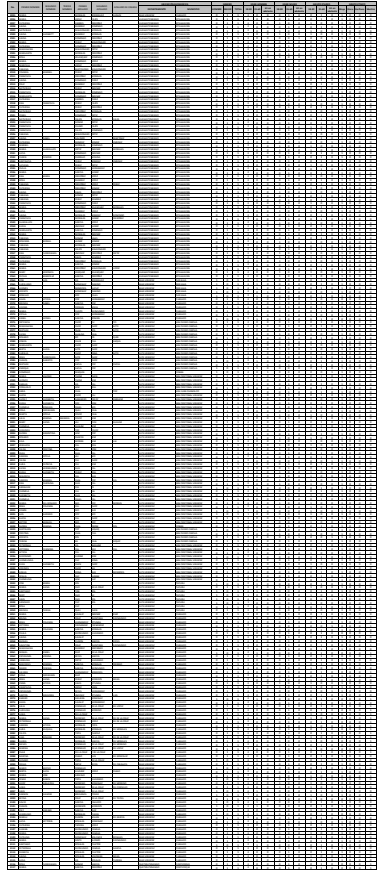

---

This image shows a vertical sheet of graph paper. The grid consists of small squares, each measuring 1 centimeter by 1 centimeter. The grid is composed of 20 columns and 30 rows of squares. The lines are thin and black, creating a uniform pattern across the entire sheet.

The image shows a vertical sheet of graph paper. It features a primary grid of 10 columns and 10 rows of large squares. Within each of these large squares, there is a secondary grid of 10 columns and 10 rows of smaller squares, creating a total of 100 columns and 100 rows of the smallest grid units. The grid is composed of thin black lines on a white background.

---

---

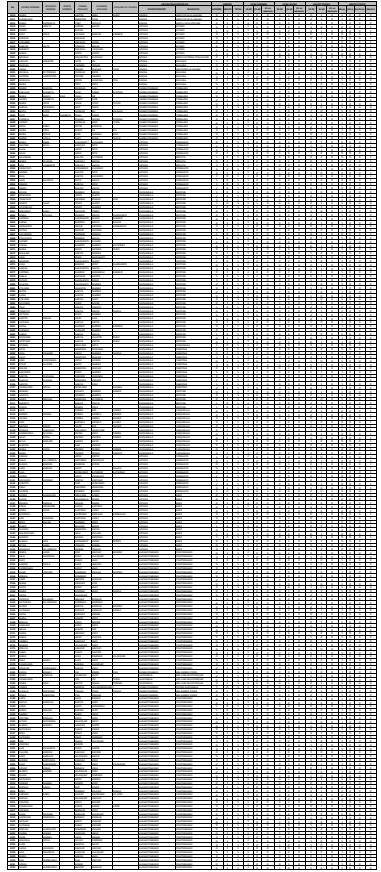

The image shows a large grid of graph paper. It consists of a 10x10 major grid of squares. Each of these major squares is further divided into a 10x10 minor grid of smaller squares, creating a total of 100x100 small squares. The grid is oriented vertically on the page.

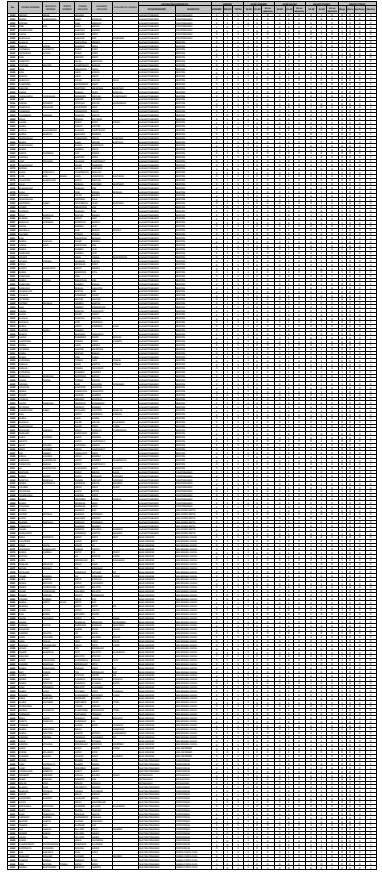

-----

---

-----

---

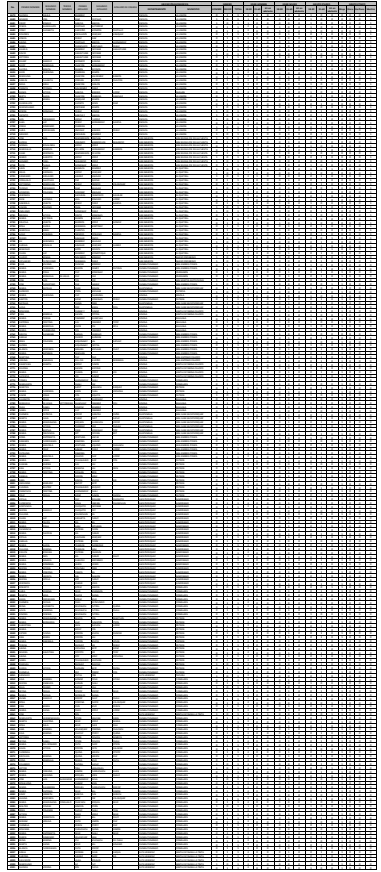

-----

---

The image shows a vertical sheet of graph paper. It features a grid of small squares. A vertical line is drawn on the right side, creating a narrow margin. The grid extends to the left edge of the page. The paper is otherwise blank, with no text or markings.

-----

---

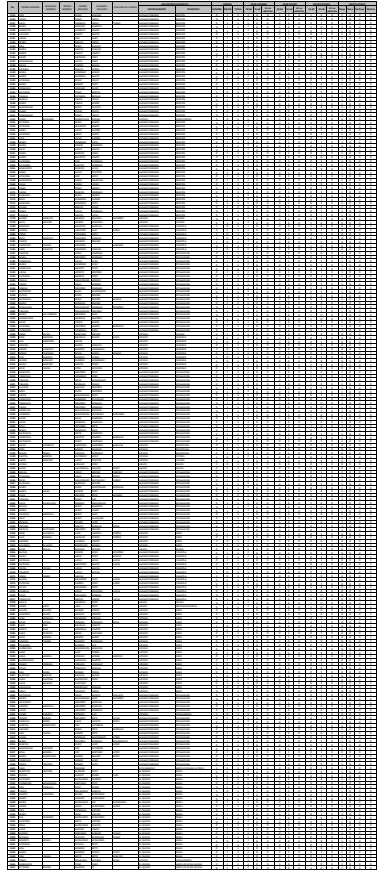

---

A large grid of graph paper with a 1cm square grid pattern. The grid is composed of 20 columns and 30 rows of small squares. The grid is centered on the page.

-----

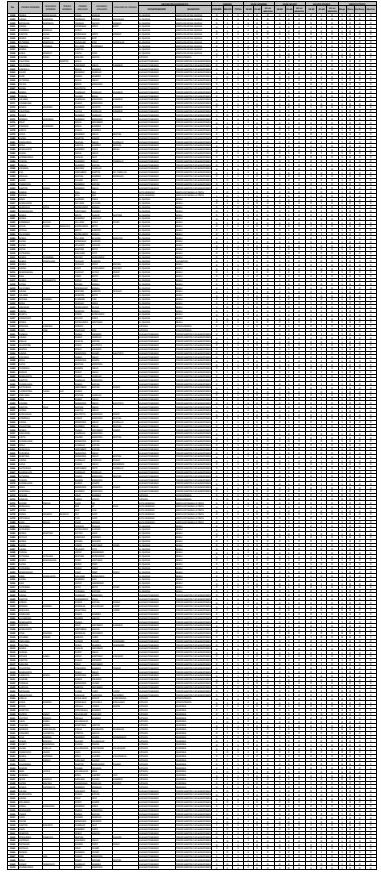

---

---

---

---

---

The image shows a large grid of graph paper. It is composed of a 10x10 grid of larger squares. Each of these larger squares contains a 10x10 grid of smaller squares. The grid is oriented vertically on the page. There are no markings or text within the grid.

---

---

A large, empty grid table with 20 columns and 30 rows. The grid is composed of small, uniform rectangular cells, typical of a spreadsheet or data table. The grid is positioned in the upper right quadrant of the page.
